Department of Biology Course Outline
Updated August 2017

SC/BIOL 1000 3.0 Biology I - Cells, Molecular Biology and Genetics
Fall 2017

Course Description
An introduction to major unifying concepts and fundamental principles of biology, including evolution and cell theory. Topics include cells, biological energetics, metabolism, cell division and genetics. The laboratory and lecture components must be passed independently to pass the course. Three lecture hours per week; three laboratory hours in alternate weeks. One term. Three credits.

Prerequisites
OAC Biology or 12U Biology or SC/BIOL 1500 3.00; OAC Chemistry or 12U Chemistry or SC/CHEM 1500 4.00. Course credit exclusions: SC/BIOL 1010 6.00; SC/BIOL 1410 6.00.

Course Instructors and Contact Information

Course Instructors:
Section A: Dr. Paula Wilson
Section B: Dr. Nicole Nivillac
Section C: Dr. Yi Sheng
Section D: Dr. Julie Clark

Contact for all Professors*: b1000lec@yorku.ca
Office Hours: Please consult the Moodle Website for your specific lecture section

Lecture-related email* (all sections): b1000lec@yorku.ca
Laboratory Director: Dr. Nicole Nivillac
TA Laboratory Coordinator: Alex
Laboratory-related email* (all sections): b1000lab@yorku.ca

First Year Biology Office: 102 Life Sciences Building (LSB)
First Year Biology Program Assistant: Dharti Patel

*Please see policy on email etiquette below in course policy section before sending an email

Schedule

Lecture Schedule
Section A: Monday, Wednesday and Friday 1:30-2:30pm LAS A
Section B: Monday, Wednesday and Friday 1:30-2:30pm CLH I
Section C: Thursday 7:00 – 10:00pm ACW 109
Section D: Monday, Wednesday and Friday 8:30-9:30am ACW 109

Laboratory Schedule: Please consult the university online course information site as well as the laboratory schedule found in the laboratory manual and on the laboratory Moodle site. Laboratory times and places vary by course section and lab section so please read your schedule carefully.
## Evaluation

<table>
<thead>
<tr>
<th>Component</th>

**Midterm Test 1:** Sunday October 15, 2017. 1:00pm start (1.5 to 2hr length)  
(see Midterm Format under “Other information” below)

**Midterm Test 2:** Sunday November 12, 2017. 1:00pm start (1.5 to 2hrs length)  
(see Midterm Format under “Other information” below)

**Final exam:** Scheduled by Registrar’s Office during the exam period.

**Activities:** Includes in-class questions/online quizzes/other assignments  
Mandatory, even if repeating the course.

* Many of the items used in this category will include points for participation/completion. This can include in-class questions, weekly reading quizzes and/or in-class exercises. The lowest 20% of in-class questions/ quizzes (including zeroes) will be dropped from your grade. This is to account for an occasional missed class (e.g., due to illness or other reasons) or for a forgotten/ malfunctioning electronic device, etc.

**Both lecture and laboratory components must be passed independently to pass the course.**

*Note: Final course grades may be adjusted to conform to Program or Faculty grades distribution profiles.*

## Important Dates

**Midterm Test 1**  
Sunday October 15, 2017. 1:00pm start (1.5 to 2hr length)

**Midterm Test 2**  
Sunday November 12, 2017. 1:00pm start (1.5 to 2hr length)

**FINAL EXAM:** Dates/times/rooms for exams are scheduled and published by the Registrar’s Office

**Last Day to drop the course without receiving a grade:** November 10, 2017

**Last Day to withdraw from the course and receive “W” on transcript:** December 4, 2017

*Note: for additional information on withdrawing from a course refer to [http://secretariat-policies.info.yorku.ca/policies/withdrawn-from-course-w-policy-and-guidelines/](http://secretariat-policies.info.yorku.ca/policies/withdrawn-from-course-w-policy-and-guidelines/)*

*Note: for additional important dates such as holidays, refer to the “Important Dates” section of the Registrar’s Website at [http://registrar.yorku.ca/enrol/dates/](http://registrar.yorku.ca/enrol/dates/)*

## Resources

### Textbooks and Manuals

- BIOL 1000 Fall 2017 Laboratory Manual (only available in York Bookstore)
- We have requested that a copy of the text be placed on reserve in the Steacie Library.
- Other readings may be assigned during the course and will be made available to you.

### Personal response system – via your own mobile device or computer

- This is required to participate in in-class questions (part of your activity grade)
- Details regarding how to create an account will be posted on the Lecture Moodle course website.

### Laboratory coat and safety goggles

- You must bring a laboratory coat and safety goggles to each wet lab (these are labs that occur in LSB 215, 217 and 219). If you lack one or more of these items you will not be permitted to remain in the lab and no makeup will be granted.
Course Moodle Sites
http://moodle.yorku.ca
This course has two Moodle sites – one for lecture and one for lab.

Lecture Moodle Site:
“SC/Biol1000 - Biology I - Cells, Molecular Biology and Genetics (Fall 2017-2018)”
This site will be used for posting course information including lecture slides, test grades, quizzes, etc.
Visit it often!

Laboratory Moodle Site:
“SC/Biol1000 A, B, C & D – Biology I – Cells, Molecular Biology and Genetics (LAB Fall 2017)”
This site contains information related to the laboratory component including additional laboratory material and laboratory quizzes. Visit it often!

Learning Outcomes

Upon successful completion of the lecture component, students should be able to:

• Use biological terminology with correct scientific meaning and appropriate context.
• Explain how light impacts life in different ways.
• Explain selection and its role in evolution.
• Describe the cell theory in biology, and relate this theory to other biological concepts.
• Describe the importance of membranes, and different mechanisms of membrane transport.
• Relate biological structure and function at the level of the cell, organ, and organism.
• Identify key similarities and differences between bacteria, archaea and eukaryotic cells.
• Compare and contrast major biochemicals and biochemical pathways (including cellular respiration, photosynthesis, cell signaling).
• Compare and contrast different mechanisms regulating gene expression.
• Describe processes of mitosis and how the cell cycle works in eukaryotic cells.
• Describe how chromosome movement during meiosis reflects Mendel’s principles of independent assortment and segregation. Solve Mendelian genetics problems involving one or two genes.
• Describe the relationship between genes, alleles, proteins and phenotype.
• Describe the mechanisms that can lead to genetic diversity, identify patterns of inheritance relating to sex linkage, gene linkage, codominance and incomplete dominance.
• Describe basic techniques used in recombinant DNA technology and their significance.

Upon successful completion of the laboratory component of BIOL 1000 3.0, students should be able to:

• Carry out basic biological laboratory activities with safety and reliability.
• Develop hypotheses and make predictions for simple biological laboratory experiments
• Design simple experiments and successfully trouble shoot where necessary
• Make descriptive observations and critically analyse data
• Prepare clear, appropriately labeled & formatted figures and tables for presentation of biological results.
• Prepare components of a basic biology laboratory report
• Describe what constitutes plagiarism. Prepare written work that abides by principles of academic integrity.
• Effectively and collegially work with others in the biology laboratory and class setting.
Course Content

This course introduces you to biological terminology and major concepts that underlie this field. The scope of material is broad, and we encourage you to consider common threads and themes that extend across the various topics. Biology, Environmental Biology and Biochemistry majors will develop a foundation for further study in biology and related areas; all students will develop familiarity with the field and gain skills that can be applied in other courses and settings. This course is intended to help develop the scientific literacy and critical thinking skills required of citizens in modern society.

The laboratory is a key part of this course, as experimentation, observations and communication of biological phenomena are important aspects of “doing” (and understanding) science. The skills gained in the laboratory component will be valuable in future laboratory courses, and often can be applied in other academic or workplace situations.

Lecture Topics will include

- Introduction to Evolution
- Molecules of Life
- Bacteria, Archaea and Eukaryotic Cell Structure
- Membrane and Transport
- Energy and Enzymes
- Respiration and Photosynthesis
- Cell Continuity: Mitosis and Meiosis
- DNA Structure and Replication, Gene Expression
- Introduction to Biotechnology
- Genetics
- Cell Communication

A detailed Lecture Outline and topic-specific learning outcomes are available on the Lecture Moodle Website.

Experiential Education and E-Learning

Experiential Education
- Laboratory work

E-Learning:
- Moodle Website
- online quizzes (lecture and lab)
- clickers in the classroom
- supplemental videos and presentations for laboratories

Other Information

- Laboratories Start the week of September 11, 2017 for Group 1, 2 & 3
- Laboratories Start the week of September 18, 2017 for Group 4, 5 & 6
- The last day to make permanent lab switches is Monday September 11, 2017 at 11:59pm.

See the lab manual for schedule details and to determine your group.

Midterms and Final Exam
Midterms and exams will consist primarily of multiple choice questions, with one or more short answer questions likely.

Midterm Test Format

- Midterms will be two-stage. This means that they will be written in two-parts during the test time; an individual portion and a group portion.
- Part one (individual portion) will be completed on your own. After this individual portion is done,
you’ll get into groups of three to four and complete the same (or very similar) test in a group. You will create your own groups, selecting only from individuals within your laboratory section. Further details will be provided during your laboratory session. Groups need to be finalized by the end of the lab 2 session. Note: you will be forming groups of 4 as part of lab 2, for the lab exercises, so you may want to consider working with these same individuals for the group component of the two-stage test. Students without a group at the time of the test will be assembled into groups of 3 or 4 by the invigilators.

- Why use two-stage testing? Research shows that this form of assessment results in improved student learning. As well, you’ll work on skills such as working as a group, coming to a consensus as a group, listening skills, discussion skills, the ability to articulate ideas. These are all transferrable skills that are desired by employers and professional schools.
- There is no risk of your mark being lowered by using two-stage testing. Your individual portion will be worth 85% of your grade for that test while the group mark will be worth 15% of your grade for that test. Your group mark can only improve your grade.

- If you are writing midterm tests with Alt Exams: You will first write the individual portion of the test with Alt Exams, then you will need to be in your assigned test classroom in time for the group part of the test. Typically, the individual part of the test is allotted between 50 and 60 minutes, so you should schedule with Alt Exams accordingly.
- The makeup test will not be two-stage. This test will be individual only, and may be in a different format from the original test.

Final Exam Format
- The final exam will be written individually only. There will be no group component to the final exam.

Course Policies

E-mail Policies and etiquette
We will try to respond to email within two working days, but this is not always possible. We may also answer your question in the next class meeting if appropriate. Questions and answers that we deem of interest to the entire class will be posted on the appropriate discussion board or sent via course announcements if urgent.

In order to ensure a prompt answer please follow the following guidelines. Email messages not meeting these guidelines may not be answered.

- Use your @my.yorku.ca email address when emailing instructors and others within the university. Email from other sources may be filtered out and not reach the intended recipient.
- SUBJECT LINE - Include the course code, course section and brief indication of topic. Lecture email example: BIOL1000A – question regarding plasma membrane
  Lab email example: BIOL1000C – missed lab 2 because of illness.
- The course section is critical to ensure the appropriate instructor receives your message.
- Include your NAME and STUDENT NUMBER at the end of each email. We work with hundreds of students and the only way we can access your course information is via your student number.
- Remember, you are in a professional environment and thus all your written correspondence, including emails, should be professional. This means full sentences, proper grammar, NO text message lingo. Please begin your message appropriately: “Dear Professor XXXX” not “Hey!”.
- Before emailing the instructor, consider the nature of your question and whether another resource should be consulted first. For example, most of the information you need is in this outline or posted on the course website. Lab-related queries should be directed to the lab email b1000lab@yorku.ca.

Policy for a Missed Midterm Test 1 or Midterm Test 2
- You must email your instructor at b1000lec@yorku.ca within two days (48 hours) of missing the test (the sooner the better).
- Valid and appropriately detailed documentation supporting the events (typically medical or emergency related) preventing your attendance must be uploaded to the Department of Biology Document Submission System within seven (7) days of the missed test. The link to the document submission system is available on the Lecture Moodle site. Documentation should
cover the date of the missed test.
  o Medical (illness) related: You must see a physician while you are ill - within 24 hours of
    the missed test – ideally on the same day - so that the physician can confirm you are
    too ill to attend the test based on medical examination. If you see the physician when
    you are not ill, he/she cannot confirm the illness and we will not accept such
    documentation. Valid documentation for medical situations consists of an “Attending
    Physician’s Statement” (July 2017 form only) from the registrar petitions package
    http://myacademicrecord.students.yorku.ca/academic-petitions or letter/document of
    similar detail. A note that simply says you were seen in the clinic will not be accepted.
  o Death of an immediate family member: death certificate or letter from the funeral
    director.
  o Other circumstances: Contact your instructor (b1000lec@yorku.ca) to determine the
    appropriate documentation required.
    • If appropriate documentation is not provided within seven (7) days, a zero will be earned on the
      missed midterm.
    • Not all situations will be accommodated, meaning that a zero may be earned on the missed
      test. Circumstances not accommodated include, but are not limited to, schedule confusion,
      sleeping in, missing the bus, personal endeavours (including a job), and busy lives.
    • Where appropriate and possible, makeup tests will be scheduled. These may differ in format
      from the original test (i.e., include more short/long answer questions).

Policy for a Missed Final Exam
• If you miss the final examination you must petition for deferred standing. The decision to grant
  deferred standing will be made by the appropriate committee and not the instructor. Instructors
  will not grant deferred standing via a Deferred Standing Agreement Form (DSA).
• See “Deferred Standing Guidelines for Final Exam Only” on the course Moodle site for further
  details.
• The format of the make-up final exam for this course may be essay, short answer, multiple
  choice, or a mix of these options.

Discussion Forum Code of Conduct
You are encouraged to participate in the online Moodle forums to discuss course concepts, organize
study groups, and ask questions relating to Biology. The discussion on the forums has typically been
polite and respectful, and we hope this will continue. You are expected to follow the following code of
conduct when using the Moodle forums:
  • Check to see if your question has already been posted. (You can search the forums – you don’t
    have to read each post!) If your question hasn’t already been asked, please post in the most
    appropriate area. (E.g., if your question is about a lab submission, your post should be in the
    “Laboratory” forum.)
  • Use a clear, informative subject line. Try to be as specific as possible.
  • Post comments appropriate to the particular discussion. Off-topic posts may be moved or
    deleted.
  • Be respectful. Posts containing personal insults/ attacks/ intimidation/ profanity will be deleted.
    (Your instructors read forum posts!). Please follow the York University Student Code of Conduct
    http://www.yorku.ca/oscr/codeofrr.html
  • Post only material relevant to BIOL 1000. Other posts will be deleted.
  • While it is appropriate to engage in debate/ discourse on biological topics, such discussions
    should be respectful and evidence-based. Evidence should be from trusted sources – consult
    with the library if you are not sure! (See: http://www.yorku.ca/webclass/module4a.html)
  • Any posts that appear to violate our code of conduct may be edited, moved or deleted at the
    discretion of instructors/moderators. If posts give indications of violations of academic honesty
    or the York University student code of conduct, further action will be taken.
  • If you notice any inappropriate threads please email b1000lec@yorku.ca

Policy for Recording Lectures
Photographs or video recordings of any portion of the lectures (including slides) are not permitted.
Images and material presented are subject to Canadian copyright law.

Audio recordings are permitted provided they are used only as a personal study aid. They may not be
sold, passed on to others or posted online. Remember the lectures are the intellectual property of the
professor and cannot be distributed without permission. Lectures can only be recorded from your seat. No recording devices are permitted at the front of the room, including front table(s), the lectern and computer area.

**Reappraisal Requests**

If you believe that a course evaluation component (e.g. laboratory report or test question) was graded incorrectly, you may request a grade reappraisal for the work. For reappraisals of midterm test material, you must submit a written rationale for the request that is based on academic grounds*, together with the material to be regraded, to the First Year Biology Office (LSB 102) within one week of the material being made available to you. If it is determined that you have provided sufficient academic grounds, the material will be regraded by an instructor.

*Note: Regrading can result in the grade being raised, confirmed or lowered.*

For reappraisals of laboratory work, please refer to the BIOL 1000 Lab Manual.

*Award academic grounds means you make an academic argument for why your answer is correct – statements such as “this grade does not reflect my knowledge” or “I really studied hard and I deserve a better grade” are not academic grounds.*

In order to be fair and consistent with regards to the entire class, individual grades are not negotiable. We cannot provide “extra credit” assignments. Marks for assignments and tests will not be “rounded” or “bell-curved”. Contact the Course Director about grades only if there is a clear error in your grade (calculation, clerical, etc.) within one week of the test score being made available to you at b1000lec@yorku.ca.

### University Policies

**Academic Honesty and Integrity**

York students are required to maintain the highest standards of academic honesty and they are subject to the Senate Policy on Academic Honesty ([http://secretariat-policies.info.yorku.ca/policies/academic-honesty-senate-policy-on/](http://secretariat-policies.info.yorku.ca/policies/academic-honesty-senate-policy-on/)). The Policy affirms the responsibility of faculty members to foster acceptable standards of academic conduct and of the student to abide by such standards. There is also an academic integrity website with comprehensive information about academic honesty and how to find resources at York to help improve students’ research and writing skills, and cope with University life. Students are expected to review the materials on the Academic Integrity website at – [https://spark.library.yorku.ca/academic-integrity-what-is-academic-integrity/](https://spark.library.yorku.ca/academic-integrity-what-is-academic-integrity/)

**Access/Disability**

York University is committed to principles of respect, inclusion and equality of all persons with disabilities across campus. The University provides services for students with disabilities (including physical, medical, learning and psychiatric disabilities) needing accommodation related to teaching and evaluation methods/materials. These services are made available to students in all Faculties and programs at York University. Student's in need of these services are asked to register with disability services as early as possible to ensure that appropriate academic accommodation can be provided with advance notice. You are encouraged to schedule a time early in the term to meet with each professor to discuss your accommodation needs. Please note that registering with disabilities services and discussing your needs with your professors is necessary to avoid any impediment to receiving the necessary academic accommodations to meet your needs.

Additional information is available at the following websites:
- [Counselling & Disability Services - http://cds.info.yorku.ca/](http://cds.info.yorku.ca/)
- [Counselling & Disability Services at Glendon - http://www.glendon.yorku.ca/counselling/](http://www.glendon.yorku.ca/counselling/)

York University issued Accommodation Letters should be emailed to b1000lec@yorku.ca

**Ethics Review Process**

York students are subject to the York University Policy for the Ethics Review Process for Research Involving Human Participants. In particular, students proposing to undertake research involving human participants (e.g., interviewing the director of a company or government agency, having students
complete a questionnaire, etc.) are required to submit an Application for Ethical Approval of Research Involving Human Participants at least one month before you plan to begin the research. If you are in doubt as to whether this requirement applies to you, contact your Course Director immediately.

**Religious Observance Accommodation**
York University is committed to respecting the religious beliefs and practices of all members of the community, and making accommodations for observances of special significance to adherents. Should any of the dates specified in this syllabus for an in-class test or examination pose such a conflict for you, contact the Course Director within the first three weeks of class. Similarly, should an assignment to be completed in a lab, practicum placement, workshop, etc., scheduled later in the term pose such a conflict, contact the Course director immediately. Please note that to arrange an alternative date or time for an examination scheduled in the formal examination periods (December and April/May), students must complete an Examination Accommodation Form, which can be obtained from Student Client Services, Student Services Centre or online at [https://registrar.yorku.ca/sites/registrar/files/pdf/exam_accommodation.pdf](https://registrar.yorku.ca/sites/registrar/files/pdf/exam_accommodation.pdf) (PDF)

**Student Conduct in Academic Situations**
Students and instructors are expected to maintain a professional relationship characterized by courtesy and mutual respect. Moreover, it is the responsibility of the instructor to maintain an appropriate academic atmosphere in the classroom and other academic settings, and the responsibility of the student to cooperate in that endeavour. Further, the instructor is the best person to decide, in the first instance, whether such an atmosphere is present in the class. The policy and procedures governing disruptive and/or harassing behaviour by students in academic situations is available at - [http://secretariat-policies.info.yorku.ca/policies/disruptive-andor-harassing-behaviour-in-academic-situations-senate-policy/](http://secretariat-policies.info.yorku.ca/policies/disruptive-andor-harassing-behaviour-in-academic-situations-senate-policy/)
