

Faculty of Science and Engineering Department of Biology

Course: BIOL 4370 3.0M Neurobiology

Course Web Site: <http://moodle11.yorku.ca/moodle/>

Please note that the BIO4370 teaching staff do not have any control over the server. If you have any problems associated with the Moodle server you must contact helpdesk directly: helpdesk@yorku.ca.

Term: Winter Term 2012

Location: CLH J

Prerequisite:

Prerequisites: SC/BIOL 2020 4.00; SC/BIOL 2021 4.00; SC/BIOL 3060 4.00.

Course Credit Exclusion: AS/HH/SC/KINE 4512 3.00

Course Instructor

Course Director: Dr. Thilo Womelsdorf
320 Lumbers

Office Hours: arrange by e-mail

thiwom@yorku.ca

Course Guest Lecturer: Dr. Georg Zoidl
Life Science Building

Office Hours: arrange by e-mail

gzoidl@yorku.ca

Time and Location

Lectures *Wednesday* *7:00 – 10:00 pm*

Expanded Course Description

There are not enough genes in the human genome to specify the enormous complexity of the human brain, which comprises about 10^{11} neurons and 10^{14} synapses. The genetic code only specifies protein templates plus a program to enable the developing embryo and child to interact with its environment. Neurobiology studies the brain from the level of ion channel molecular structure up to complex functions such as perception and memory, which require an understanding of interactions among large groups of neurons.

Course Text

Suggested Texts:

- 1) Purves, D, Augustine, G.J., Fitzpatrick, D., Hall, W.C., LaMantia, A-S, McNamara, J.O. & White, L.E. **Neuroscience** (5th edition) Sunderland, MA: Sinauer Associates Inc.
- 2) Purves, D, Brannon, E.M., Cabeza, R., Huettel, A.A., LaBar, K.S., Platt, M.L. & Woldorff, M.G. **Principles of Cognitive Neuroscience** Sunderland, MA: Sinauer Associates Inc.

The textbook will be supplemented with more advanced material via the lecture where appropriate.

Evaluation

The final grade for the course will be based on the following items weighted as indicated:

Midterm Examination (in class March 2nd.) 45%

Final Examination (Winter Exam Session): 55%

Both exams will consist of 70 multiple choice questions (70%) and the remaining 30% will be made up of short answer questions which may include labelling of figures.

Grading: The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 90, B+ = 75 to 79, etc.)

(For a full description of York grading system see the York University Undergraduate Calendar - http://calendars.registrar.yorku.ca/pdfs/ug2004cal/calug04_5_acadinfo.pdf)

Note: Final course grades may be adjusted to conform to Program or Faculty grades distribution profiles. If an adjustment needs to be made, this will be done at the end of term.

Students may take a limited number of courses for degree credit on an ungraded (pass/fail) basis. For full information on this option see http://www.registrar.yorku.ca/pdf/passfail_option.pdf

Posting of Grades: Grades for tests and assignments will be posted on the course website as soon as they are available. Please do not ask when they will be available as the answer will inevitably be “as soon as possible”.

Missed Tests

Midterm: If you miss the midterm exam for medical reasons (only valid excuse), the make-up exam will be scheduled one evening in the week following the class exam. Attending Physicians form (available at http://www.registrar.yorku.ca/pdf/petitions/attending_physician_statement.pdf) should be submitted to the course director within one week.

Final: For a missed final, you must provide a completed Attending Physician’s form (available at http://www.registrar.yorku.ca/pdf/petitions/attending_physician_statement.pdf). This is the ONLY form of medical documentation, which is acceptable.

Tests in Alternative Exams:

Students with an up-to-date letter of accommodation from the Counselling and Development Centre which allows them to sit exams as part of the Registrar’s Office Alternative Exams scheme are responsible for scheduling their own exams (<http://www.yorku.ca/altexams/>). To maintain the integrity of the exam, any sitting in alternative exams must be scheduled for the same day as the remainder of the class. Please note that the alternative exams facility now requires *15 business days notice*. If a student fails to make a booking in sufficient time, they will have the option of sitting the exam under the same conditions as the other students in the class or receiving an F for the exam. An additional version of the examination will not be set to accommodate a tardy student. It is recommended that every student books the date of the mid-term immediately.

Class Attendance: It is your responsibility to attend class. You will be tested on material presented in class which may not appear in the course text books. I will not respond to requests asking what a student has missed by not attending class. “I did not know” is not a valid excuse when the information has been announced in class.

Course Notes and Overheads: I will upload notes **etc. to the course website before the class. I will also post electronic resources and suggested activities**, which are relevant to particular classes there. You are strongly urged to make use of these resources to consolidate your learning. Questions (and answers) relating to the course content and administration will be posted on the course discussion board so that all students may benefit from the information. Please check the

board and post your question there in the first instance. If you do not receive a response within 48 hours during the business week, please feel free to e-mail me.

E-mail: It is recommended that all e-mails should be sent from your YorkU account. **Please put BIO4370 in the subject header of any e-mail.** If the question cannot be answered in ten words or less, it is more appropriate that you ask in person, either at office hour or after class. E-mail will not be answered at weekends, but will be dealt with as soon as possible during the week. *I will not respond to e-mails that are unsigned.*

IMPORTANT COURSE INFORMATION FOR STUDENTS

All students are expected to familiarize themselves with the following information, available on the Senate Committee on Curriculum & Academic Standards webpage (see Reports, Initiatives, Documents) - http://www.yorku.ca/secretariat/senate_cte_main_pages/ccas.htm

- York’s Academic Honesty Policy and Procedures/Academic Integrity Website
- Ethics Review Process for research involving human participants
- Course requirement accommodation for students with disabilities, including physical, medical, systemic, learning and psychiatric disabilities
- Student Conduct Standards
- Religious Observance Accommodation

Academic Honesty: I endorse the Senate’s policy on Academic Honesty and will enforce it firmly on this course. Cheating is unacceptable on this course and any student who participates in this activity can expect to be referred to the appropriate disciplinary authority for their first offence. If you are unclear what does and does not constitute cheating please refer to the Academic Integrity web site (http://www.yorku.ca/tutorial/academic_integrity/) and read the section ‘For Students’. If you have not completed the Academic Integrity Tutorial which is hosted there, then I would urge you to do so. I am happy to answer specific questions about what does and does not constitute cheating when it is accompanied with a copy of the proof of completion of the tutorial.

Tentative Course Schedule – Please consult the up-to-date schedule on the course website.

		Suggested Reading
Jan. 4 th	<u>Introduction to Neurobiology</u> - Cellular Components - Basics: Cellular Signalling - Neuronal Circuits - Neuroanatomy and Neuronal Systems	Purves Neurosc.- Chapter 1, Purves Neurosc.- Appendix A, Purves Princ Cog Neuro.- Chapter 1,
