

Department of Biology Course Outline

SC/BIOL 3030 4.00 Physiology of the Invertebrates
Winter 2016/2017

Course Description

A treatment of the physiology of major invertebrate phyla with emphasis on interphyletic relationships. Laboratory exercises address the diversity and physiology of invertebrates. Three lecture hours, three laboratory hours. One term. Four credits.

Prerequisites

SC/BIOL 2030 4.00.

Course Instructors and Contact Information

Course Director

Dr. Andrew Donini
205 Lumbers Building
adonini@yorku.ca

Teaching Assistant

Lidiya Misyura
205 Lumbers Building
lidiyam@my.yorku.ca

Schedule

Lecture Times: Tuesdays and Thursdays: 8:30am to 10am in LSB 101

Lab Times: Wednesday 2:30pm to 5:30pm in Farquharson 217
 Thursday 2:30pm to 5:30pm in Farquharson 217
(Please attend only the lab section you are registered for)

Evaluation

Full Lab Report 1 (Earthworm) Due: February 8 th /9 th	15%
Results Lab Report 2 (Proteins/Nitrogenous wastes) Due: February 17 th	5%
Midterm Exam February 16 th	20%
Results Lab Report 3 (Malpighian tubules) Due: March 8 th /9 th	5%
Full Lab Report 4 (Daphnia) Due: March 15 th /16 th	10%
Group Reviews and Presentations Due: March 28 th	10%
Final Exam (Formal April Exam Period)	35%

Important Dates

See Evaluation above for due dates of labs and exams.

NOTE: for additional important dates such as holidays, refer to the "Important Dates" section of the Registrar's Website at <http://www.yorku.ca/yorkweb/cs.htm>

Resources

There is no text book for this course. Most lecture material is sourced from primary literature (published, peer reviewed papers) and from books which are on reserve in the Steacie Science and Engineering Library.

There is no lab manual. The 4 lab protocols are posted on the Moodle course page and students are expected to download and print them prior to the lab session.

Course Website: Moodle

Learning Outcomes

Upon successful completion of this course, students should be able to:

1. explain how specific invertebrates are important to our society from an economic standpoint and from a health perspective.

Assessment: written tests and examinations, written reports and oral presentations

2. describe the morphology and associated physiology of invertebrate adaptations to locomotion, feeding, the maintenance of solute balance, extreme temperature tolerance and the processing of sensory information through the nervous system.

Assessment: written term tests and examinations, written reports and oral presentations, laboratory experiments with associated written reports.

3. describe and carry out various experimental techniques and know how to apply them to solve physiological questions.

Assessment: laboratory experiments with associated written reports, written examinations and term tests.

4. possess good scientific writing skills and oral presentation skills.

Assessment: written review, laboratory reports, oral presentation

Course Content

The invertebrates are a medically, economically and ecologically important group of animals. A number of invertebrates act as pathogens or vectors of disease. Malaria is one of the most important diseases in the world and is caused by a protozoan that is transmitted by anopheline mosquitoes. Economically speaking, invertebrates can be detrimental, serving as pests that destroy crops, but can also benefit us by serving as sources of food (eg. shrimp, lobster). Ecologically, invertebrates are an integral part of the food chain and can be utilized as bioindicators. Therefore it is in our best interest to study and understand the unique physiological processes of each phylum.

Tentative Lecture Schedule:

Jan. 5th: Introduction, Importance of Invertebrates
Jan. 10th: Physiology defined
Jan. 12th: Classification of Invertebrates
Jan. 17th: Unicellular Eukaryotes: Osmoregulation
Jan. 19th: Unicellular Eukaryotes: Locomotion
Jan. 24th: Unicellular Eukaryotes: Feeding
Jan. 26th: Porifera: Cell types, Architecture
Jan. 31st: Porifera: Glass sponge, Histoincompatibility, Reproduction
Feb. 2nd: Ammonia Excretion Mechanisms of Invertebrates
Feb. 7th: Cnidaria: Cell types, nematocyst discharge
Finish nematocyst discharge, Anthozoan aggression
Feb. 9th: Cnidaria: Finish nematocyst discharge, Anthozoan aggression
Feb. 14th: REVIEW SESSION
Feb. 16th: MIDTERM EXAM
Feb. 20th: READING WEEK NO CLASSES, NO LABS
Feb. 28th: Nematoda and Platyhelminthes: Mechanoreceptors and Tubeworms
Mar. 2nd: Mollusca: Chromatophores, Iridiphores
Mar. 7th: Mollusca: Squid Jet Propulsion
Mar. 9th: Flatworms
Mar. 14th: Echinodermata
Mar. 16th: Arthropoda I Ecdysis
Mar. 21st: Arthropoda II Cold Stress
Mar. 23rd: Arthropoda III Osmoregulation
Mar. 28th: ORAL PRESENTATIONS
Mar. 30th: ORAL PRESENTATIONS
Apr. 4th: REVIEW SESSION

Laboratory Schedule:

Jan. 18, 19: Earthworm Crop and Gizzard Part 1
Jan. 25, 26: Earthworm Crop and Gizzard Part 2
Feb. 8, 9: Metabolism of Proteins
Mar. 1, 2: Malpighian tubules
Mar. 8, 9: Daphnia

Experiential Education and E-Learning

Supplementary lecture material on Moodle.

Other Information

None

Course Policies

Grading: The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests will bear number grade (e.g. A+ = 90 to 100, A = 80 to 90, B+ = 75 to 79, etc.) (For a full description of York grading system see the York University Undergraduate Calendar - http://calendars.registrar.yorku.ca/pdfs/ug2004cal/calug04_5_acadinfo.pdf)

Group Review and Presentation Due Date Rules: Proper academic performance depends on students doing their work not only well, but on time. Accordingly, the literature review for this course must be received on **March 28 by 8:30am (in class)** and **All individuals (ALL members of each group)** must be ready to present their work on **March 28 at 8:30AM (in class)**. Since you will know what your topic is in January **there will be NO extensions granted for any reason for the report. A late penalty of 10% of the final grade, per day will apply.** (example: if an individual is given 70% for the report and presentation but, the report was handed in on March 27 then their final grade for the report and presentation will be 63%. **If a member of a group is absent, then that member will receive a grade of zero on the oral presentation portion of the grade** (Exceptions to the lateness penalty for the presentation portion for valid reasons such as illness, compassionate grounds, etc., **may, but not necessarily, be** entertained but will require supporting documentation, example, an Attending Physicians Statement). **NO EXTENSIONS WILL BE GIVEN.**

Lab Reports Due Date Rules: Proper academic performance depends on students doing their work not only well, but on time. Accordingly, the formal lab reports and results sections must be handed in on the due dates. **A late penalty of 10% of the final grade, per day will apply. NO EXTENSIONS WILL BE GIVEN.**

Missed Tests: Students with a documented reason for missing a test, such as illness, compassionate grounds, etc., which is confirmed by supporting documentation (e.g., Attending Physicians statement) **may** be permitted to **either** take an oral make-up test no later than **1 week** after the scheduled test date **or** transfer the weight of the missed test to the final exam **at the course director's discretion. Further extensions or accommodation will require students to submit a formal petition to the Faculty.**

University Policies

Academic Honesty and Integrity

York students are required to maintain the highest standards of academic honesty and they are subject to the Senate Policy on Academic Honesty (<http://secretariat-policies.info.yorku.ca/policies/academic-honesty-senate-policy-on/>). The Policy affirms the responsibility of faculty members to foster acceptable

standards of academic conduct and of the student to abide by such standards.

There is also an academic integrity website with comprehensive information about academic honesty and how to find resources at York to help improve students' research and writing skills, and cope with University life. Students are expected to review the materials on the Academic Integrity website at - <http://www.yorku.ca/academicintegrity/>

Access/Disability

York University is committed to principles of respect, inclusion and equality of all persons with disabilities across campus. The University provides services for students with disabilities (including physical, medical, learning and psychiatric disabilities) needing accommodation related to teaching and evaluation methods/materials. These services are made available to students in all Faculties and programs at York University.

Students in need of these services are asked to register with disability services as early as possible to ensure that appropriate academic accommodation can be provided with advance notice. You are encouraged to schedule a time early in the term to meet with each professor to discuss your accommodation needs. Please note that registering with disabilities services and discussing your needs with your professors is necessary to avoid any impediment to receiving the necessary academic accommodations to meet your needs.

Additional information is available at the following websites:

Counselling & Disability Services - <http://cds.info.yorku.ca/>

Counselling & Disability Services at Glendon - <http://www.glendon.yorku.ca/counselling/personal.html>

York Accessibility Hub - <http://accessibilityhub.info.yorku.ca/>

Ethics Review Process

York students are subject to the York University *Policy for the Ethics Review Process for Research Involving Human Participants*. In particular, students proposing to undertake research involving human participants (e.g., interviewing the director of a company or government agency, having students complete a questionnaire, etc.) are required to submit an *Application for Ethical Approval of Research Involving Human Participants* at least one month before you plan to begin the research. If you are in doubt as to whether this requirement applies to you, contact your Course Director immediately.

Religious Observance Accommodation

York University is committed to respecting the religious beliefs and practices of all members of the community, and making accommodations for observances of special significance to adherents. Should any of the dates specified in this syllabus for an in-class test or examination pose such a conflict for you, contact the Course Director within the first three weeks of class. Similarly, should an assignment to be completed in a lab, practicum placement, workshop, etc., scheduled later in the term pose such a conflict, contact the Course director immediately. Please note that to arrange an alternative date or time for an examination scheduled in the formal examination periods (December and April/May), students must complete an Examination Accommodation Form, which can be obtained from Student Client Services, Student Services Centre or online at

http://www.registrar.yorku.ca/pdf/exam_accommodation.pdf (PDF)

Student Conduct in Academic Situations

Students and instructors are expected to maintain a professional relationship characterized by courtesy and mutual respect. Moreover, it is the responsibility of the instructor to maintain an appropriate academic atmosphere in the classroom and other academic settings, and the responsibility of the student to cooperate in that endeavour. Further, the instructor is the best person to decide, in the first instance, whether such an atmosphere is present in the class. The policy and procedures governing disruptive and/or harassing behaviour by students in academic situations is available at - <http://secretariat-policies.info.yorku.ca/policies/disruptive-and-or-harassing-behaviour-in-academic-situations-senate-policy/>
