## Department of Biology Course Outline

### SC/Biol 4220 4.00
Histology Fall 2016

### Course Description
Structure and function of tissues in vertebrates, with special emphasis on human histology. The laboratory deals with basic histological and histochemical techniques, such as tissue sectioning and staining, and localization of enzymes. Three lecture hours, three laboratory hours. One term. Four credits.

### Prerequisites
SC/Biol 2020 3.00, SC/Biol 2021 3.00, SC/Biol 2070 3.00

### Course Instructors and Contact Information
Course Director – Dr. Saber Saleuddin  
Office – 013 Farquhason  
Email – saber@yorku.ca

Office hours – normally between 11 am and 12 noon, or by appointment (easily set up with an email request).

### Schedule
Lectures: Tuesday and Thursday – 1:00 pm – 2:30 pm. Room 307 Accolade West  
Labs – see moodle site – dates, locations in lab manual.

### Evaluation
Learning Outcomes

Upon successful completion of this course, students should be able to:

1. describe techniques for preserving tissues and preparing for viewing using histochemistry/cytochemistry, autoradiography, immunohistochemistry, in situ hybridization, immunoperoxidase, FISH, etc.
2. describe techniques for viewing tissues with light microscopy – light, fluorescent, confocal, etc., and electron microscopy – TEM, SEM, AFM and interpret the resulting micrographs
3. provide an outline of cell structure including plasma membrane and cell contents
4. identify, draw and provide the general functions of the plasma membrane and associated structures
5. identify, draw and provide details of the structure and function of membrane limited and non-membranous cell organelles
6. classify and provide an overview of tissues
7. provide details of the structure, form and function of epithelial tissue and connective tissue
8. identify, draw and describe details of cell junctions in the lateral zone, apical cell membranes, basal cell membranes and associated structures
9. identify, draw and describe connective tissue cells and extracellular matrix
10. identify, draw and describe loose connective tissue and regular/irregular dense connective tissue
11. define the functions of the various connective tissues and their components
12. classify bones and briefly describe their function
13. identify, draw and describe the macro and micro structure of bones
14. recognize bone in micrographs and note the differences between mature and immature bone
15. identify, draw and describe the different types of bone and their formation

Resources

Junqueira’s Basic Histology
Authors: Anthony L. Mescher
Publisher: McGraw Hill Education
        Fourteenth Edition (available in the York bookstore)

Important Dates

See course outline below

NOTE: for additional important dates such as holidays, refer to the “Important Dates” section of the Registrar’s Website at http://www.yorku.ca/yorkweb/cs.htm

Mid-Term Exam ......................20%
Lab Assignments .....................25%
Lab Exam (Final) ......................10%
Final Exam ..........................45%

TOTAL ....................................100%

The final exam is not cumulative, and will focus on all topics covered post-midterm exam.
intramembranous bone and endochondral bone

16. describe the hormonal regulation of bone formation/re-modelling/repair
17. identify, draw and describe the structure and function of adipose tissue
18. identify, describe and draw a neuron, supporting (neuroglial) cell and the organization of
   the Central Nervous System and the Peripheral Nervous System
19. identify, draw and briefly describe the structure and functions of the organs of the digestive
   system: stomach, small intestine, large Intestine, liver, pancreas and gall bladder
20. identify, and draw the essential elements of the kidney and its various components in
   relation to the kidney as an excretory organ
21. identify, draw and relate structure to function of the ureter, the urinary bladder and the
   urethra
22. identify, describe and draw the respiratory system of a human, and answer questions on
   the structure and function of the respiratory system from a histological viewpoint
23. identify, draw and label the origins, structural components (including the blood supply in
   general where important in regulating hormone release) of the pituitary gland, the thyroid
   gland and the adrenal gland; name and identify some of the hormones produced by the
   various parts of the glands, and relate some aspects of negative feedback mechanisms
24. identify, draw and fully label the male and female reproductive system; relate the origin of
   the reproductive organs in general terms; draw and describe the structure and function of
   the organs and tissues, their products and role in reproduction
25. draw and describe some elements of the human eye

Course Content

FALL 2016. BIOL 4220 4.0, Histology

Lectures - Tues and Thurs 1:00 pm – 2:30 pm, Room 307 Accolade West

September 8, 13, Introduction; Microscopy
September 15, Epithelia
September 20, Connective Tissue
September 22, Cartilage
September 27, Bone
September 29, Adipose Tissue
October 4, Muscles
October 6, Integumentary System
October 11 & 13 Cardiovascular System
October 18 MID-TERM EXAM
October 20 & 25  Digestive System

October 27 - 30. Fall Reading Days

November 1  Respiratory System
November 3, 8  Urinary System
November 10, 15, 17  Endocrine System
November 24, 29,  Reproductive System
December 1,  Eye & Ear

Labs - Tues, Weds, Thurs, 2:30 pm - 5:30 pm Farq 204.

Note: Last day to drop course – November 11, 2016.

Last date to submit term work - December 5.

Final Exam – Date, time and location to be announced by the Registrar’s office (exam period starts December 7, ends December 22).
University Policies

Academic Honesty and Integrity
York students are required to maintain the highest standards of academic honesty and they are subject to the Senate Policy on Academic Honesty (http://secretariat-policies.info.yorku.ca/policies/academic-honesty-senate-policy-on/). The Policy affirms the responsibility of faculty members to foster acceptable standards of academic conduct and of the student to abide by such standards. There is also an academic integrity website with comprehensive information about academic honesty and how to find resources at York to help improve students’ research and writing skills, and cope with University life. Students are expected to review the materials on the Academic Integrity website at - http://www.yorku.ca/academicintegrity/

Access/Disability
York University is committed to principles of respect, inclusion and equality of all persons with disabilities across campus. The University provides services for students with disabilities (including physical, medical, learning and psychiatric disabilities) needing accommodation related to teaching and evaluation methods/materials. These services are made available to students in all Faculties and programs at York University.
Student's in need of these services are asked to register with disability services as early as possible to
ensure that appropriate academic accommodation can be provided with advance notice. You are encouraged to schedule a time early in the term to meet with each professor to discuss your accommodation needs. Please note that registering with disabilities services and discussing your needs with your professors is necessary to avoid any impediment to receiving the necessary academic accommodations to meet your needs.

Additional information is available at the following websites:
Counselling & Disability Services - http://cds.info.yorku.ca/
Counselling & Disability Services at Glendon - http://www.glendon.yorku.ca/counselling/personal.html
York Accessibility Hub - http://accessibilityhub.info.yorku.ca/

Ethics Review Process
York students are subject to the York University Policy for the Ethics Review Process for Research Involving Human Participants. In particular, students proposing to undertake research involving human participants (e.g., interviewing the director of a company or government agency, having students complete a questionnaire, etc.) are required to submit an Application for Ethical Approval of Research Involving Human Participants at least one month before you plan to begin the research. If you are in doubt as to whether this requirement applies to you, contact your Course Director immediately.

Religious Observance Accommodation
York University is committed to respecting the religious beliefs and practices of all members of the community, and making accommodations for observances of special significance to adherents. Should any of the dates specified in this syllabus for an in-class test or examination pose such a conflict for you, contact the Course Director within the first three weeks of class. Similarly, should an assignment to be completed in a lab, practicum placement, workshop, etc., scheduled later in the term pose such a conflict, contact the Course director immediately. Please note that to arrange an alternative date or time for an examination scheduled in the formal examination periods (December and April/May), students must complete an Examination Accommodation Form, which can be obtained from Student Client Services, Student Services Centre or online at http://www.registrar.yorku.ca/pdf/exam_accommodation.pdf (PDF)

Student Conduct in Academic Situations
Students and instructors are expected to maintain a professional relationship characterized by courtesy and mutual respect. Moreover, it is the responsibility of the instructor to maintain an appropriate academic atmosphere in the classroom and other academic settings, and the responsibility of the student to cooperate in that endeavour. Further, the instructor is the best person to decide, in the first instance, whether such an atmosphere is present in the class. The policy and procedures governing disruptive and/or harassing behaviour by students in academic situations is available at - http://secretariat-policies.info.yorku.ca/policies/disruptive-andor-harassing-behaviour-in-academic-situations-senate-policy/

The following books are in the Steacie Science Library:

Bloom & Fawcett's concise histology I Don W. Fawcett, Ronald P. Jersh.

Synthetic dyes in biology, medicine and chemistry. - • Gurr, Edward. (1971)

The rational use of dyes in biology and general staining methods I Foreword by M. A. MacConaill. -- Gurr, Edward. (1965)
